ABOUT ME

Computer Engineering student with strong foundations in programming and data structures. Experienced in building applications, working with databases, and developing end-to-end solutions. Interested in software engineering, backend development, and problem-solving roles across diverse tech domains.

SKILLS

Languages: Python, C++, JavaScript

Backend: REST APIs, Node.js, JWT Authentication

Databases: SQL, MongoDB

Core Concepts: Data Structures Algorithms, OOP, OS, DBMS, Computer Networks

Tools: Git, VS Code, Postman, CI/CD concepts

PROJECTS

Grooviti – Event and Turf Listing Platform (Lead Developer) [Project Link](#)

Tech Stack: React.js, Node.js, MongoDB

- Built a full-stack platform with scalable REST APIs for event discovery and registrations
- Implemented JWT-based authentication and role-based access control
- Handled structured data flow across services, simulating backend data pipelines
- Performed API testing and debugging to ensure system reliability
- Collaborated in end-to-end product development including deployment and user flow optimization
- **Impact:** 200+ registrations, 30+ events, 95% successful payment rate, 40K+ revenue handled

SmartHire – AI Interview Coach

Tech Stack: Next.js, TypeScript, MongoDB

- Built an AI-powered interview system using speech-to-text, NLP, and sentiment analysis
- Processed and analyzed user responses to evaluate confidence and answer quality
- Implemented resume parsing and generated personalized interview workflows
- Designed backend APIs and data workflows, with analytics dashboard for performance tracking

EXPERIENCE

Full Stack Intern – Aarogya Aadhar

Mar - April 2026

- Performed end-to-end website testing including API validation, UI testing, and debugging
- Ensured application reliability through basic unit and integration testing
- Worked on frontend and backend features using React.js and Node.js

Cybersecurity Intern – SkillCraft Technology

Jan 2026

- Applied secure coding practices and worked with data handling in secure systems
- Developed authentication and encryption-based tools improving system security
- Identified and mitigated vulnerabilities aligned with real-world security standards

EDUCATION

Pimpri Chinchwad College of Engineering and Research

Bachelor of Engineering in Computer Engineering (2027)

CGPA: 9.15

CERTIFICATIONS & COURSES

- Programming, Data Structures and Algorithms using Python – NPTEL
- Programming in C++, Advanced C++ – Spoken Tutorial
- Introduction to MongoDB – MongoDB
- Database Programming with SQL – Oracle

COMPETITIVE PROGRAMMING

LeetCode: 100+ problems solved

GeeksforGeeks: 70+ problems solved
